

THINK
ECOLOGICALLY

T.E.

The idea behind this movement is to make, if not everyone, most people more cautious with the environment and also make them stop taking for granted the things that nature provides to us for our living. Oxygen is necessary for survival, yet thousands and thousands of trees go to waste. This is what we are trying to accomplish to stop this madness and make earth a better place not only for us but for the nature as well.

In our movement everyone is a member, we accept anyone who is willing to help, as a volunteer. You can donate money or become a member at our website. You are also able to participate in projects that take place in and around the city where we afforest trees and try to make this world a better place.

Don't forget to think ecologically.
