OUR LOGO

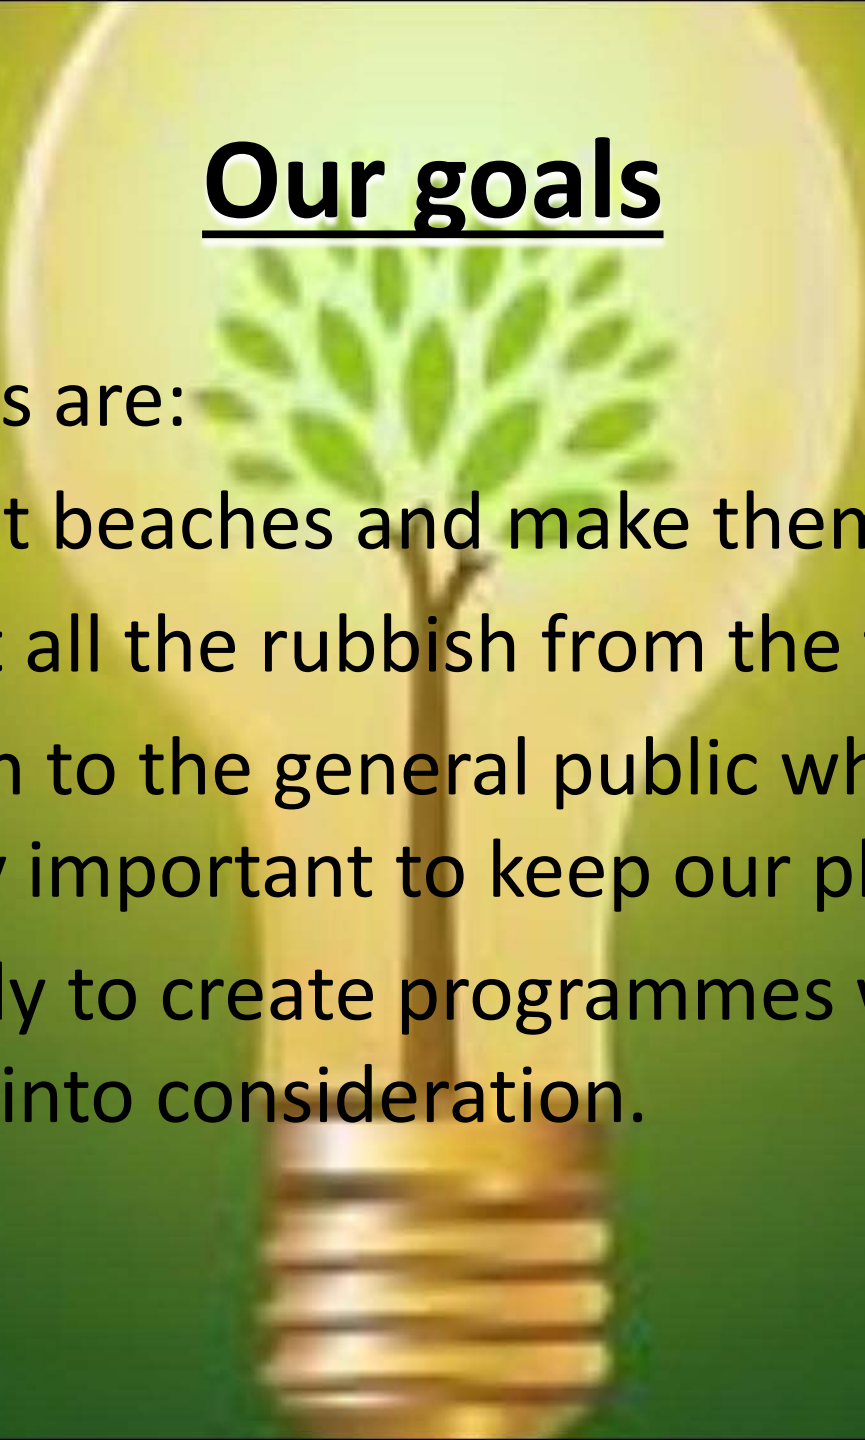

We set up our organisation in 2012

- We started our organization 2 years ago in summer when we were present at an awful image of a beach full of garbage.

Our goals

A large, glowing lightbulb is centered in the background. Inside the bulb, a green tree with many leaves is visible. The background is a dark green gradient.

Our goals are:

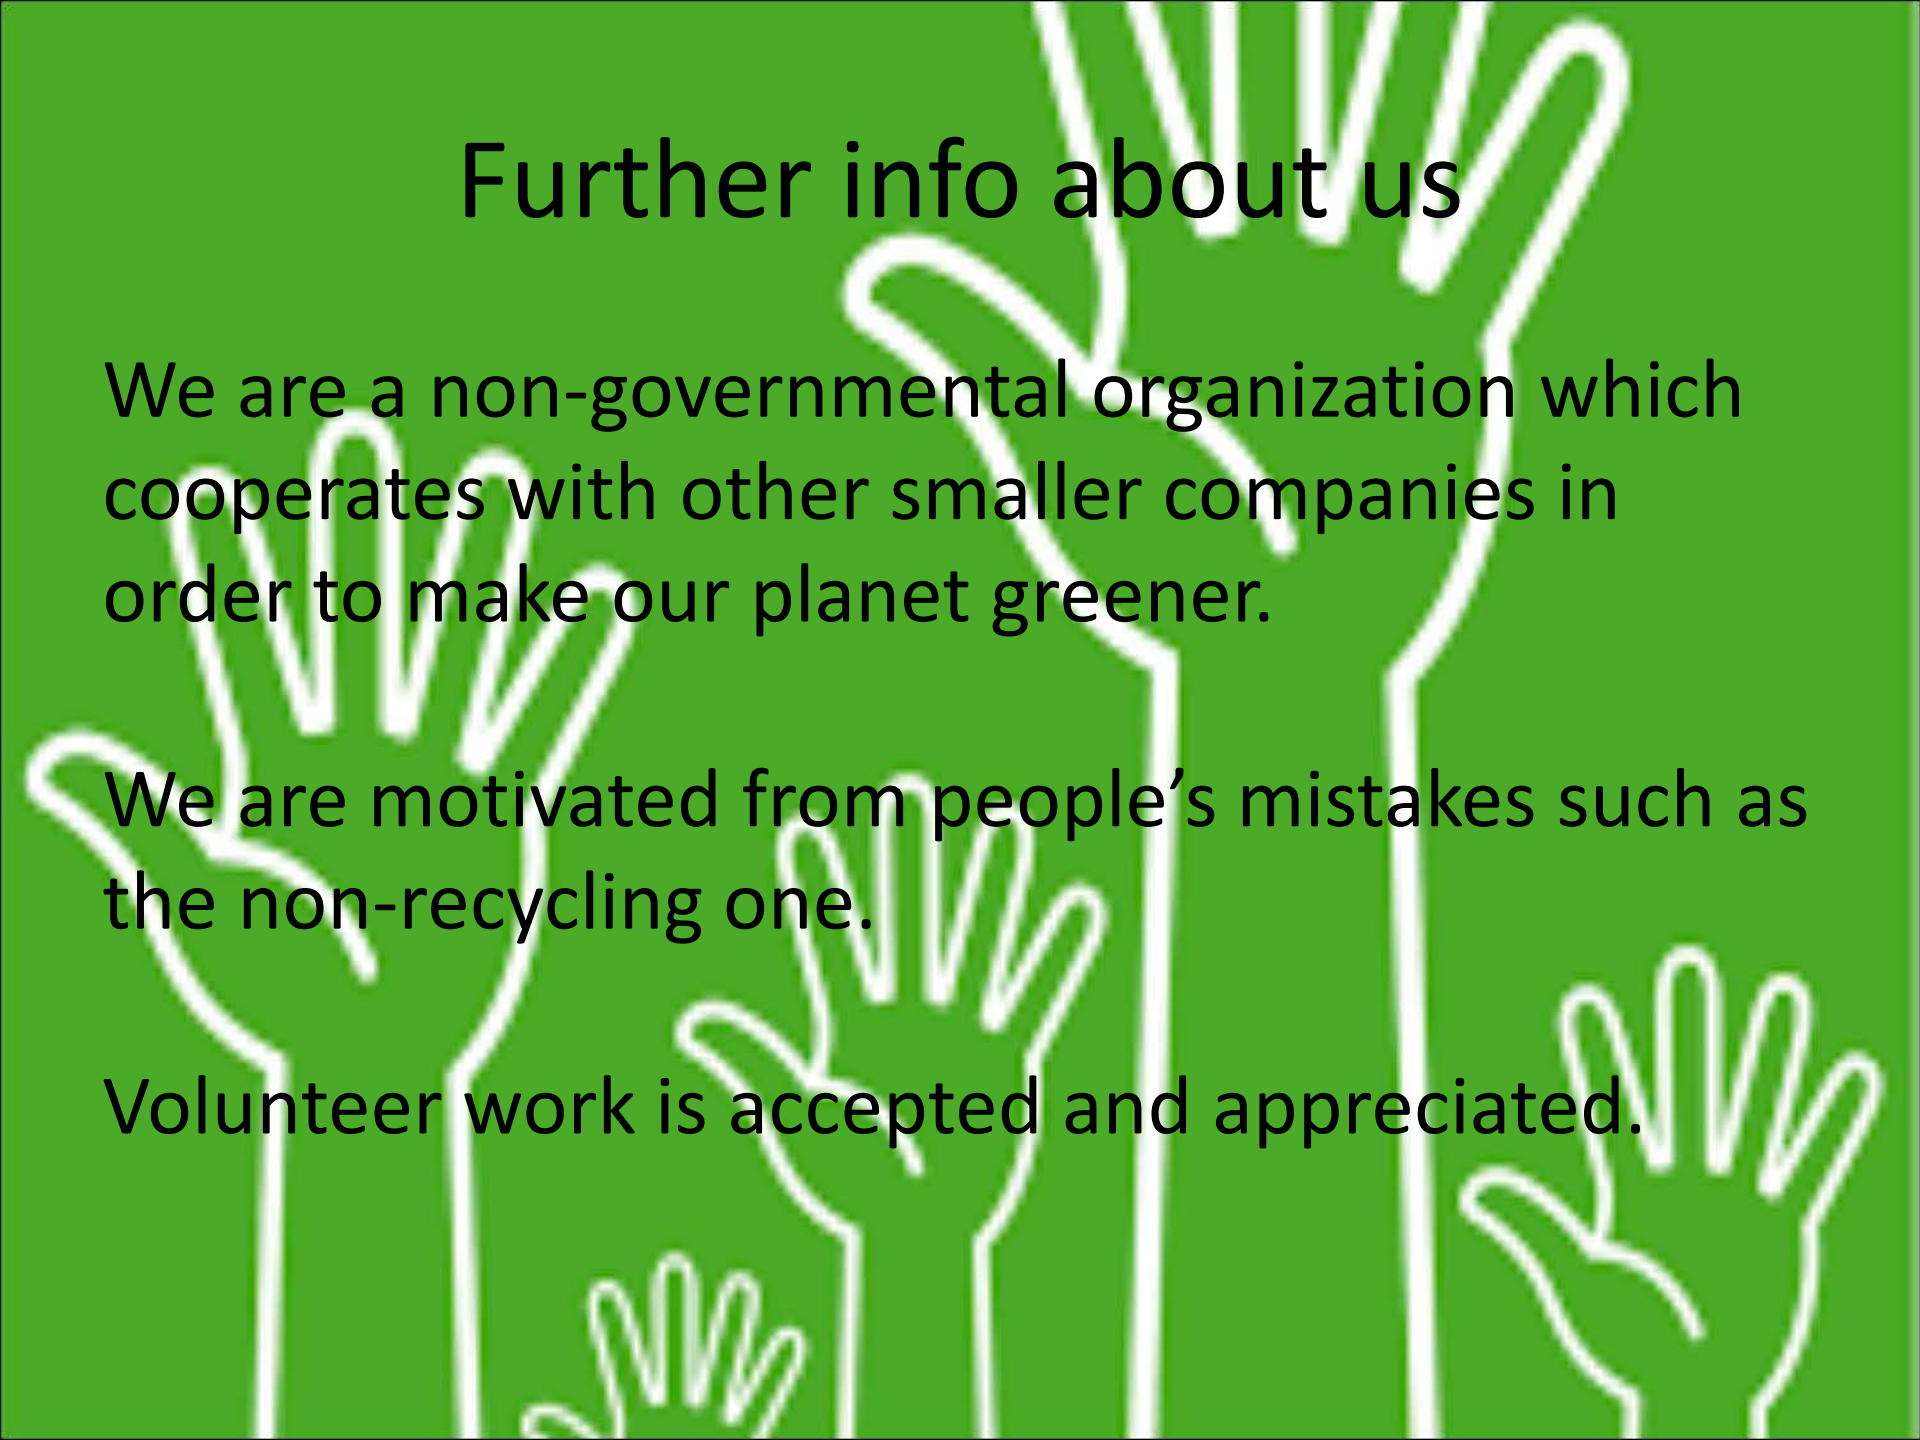

- ✓ To protect beaches and make them cleaner
- ✓ To collect all the rubbish from the forests.
- ✓ To explain to the general public why it is extremely important to keep our planet clean.
- ✓ And finally to create programmes which take this issue into consideration.

Further info about us

We are a non-governmental organization which cooperates with other smaller companies in order to make our planet greener.

We are motivated from people's mistakes such as the non-recycling one.

Volunteer work is accepted and appreciated.

Our staff

- Plenty of specialists from the fields of geology and biology are on our side.
- Also, many experts in “Green Thinking” are helping us organize our attempts.

What we have achieved

Since we started, we have achieved to clean a few beaches and forests. We know it isn't a lot but it is a start to a cleaner planet.

THE END
