

My favourite free time activity

I have many free time activities but the one I really enjoy is surfing on the internet. I don't have much free time but I always try to find some time to enjoy my favourite hobby.

I find it very interesting because I can find information about whatever I want. I can travel all around the world by using the internet. I can go to whichever country I like and I can find information about their history, sights and museums.

What is more, through the internet I can buy anything I want from anywhere in the world any time I want.

Surfing on the internet is something very relaxing for me which makes me happy and keeps me informed.
