

# Sherlock Holmes

“Sherlock Holmes” is a character created by Arthur Conan Doyle, who lives in London. He's what you would call these days - a *private detective*.

---

- Sherlock Holmes was born on January 6, 1854 and is the date that almost *everyone* agrees on .
- His hobbies are: playing the violin, conducting chemical experiments and attending concerts of some of the famous music composers of that time.

“My name is Sherlock Holmes. It is my business to know what other people don’t know.”

– “The Adventure of the Blue Carbuncle”

- Everyone tells Holmes their problems: the police, poor people, rich people, and anyone else you can think of. Holmes smokes his pipe, observes things and solves their problems with his thoughts.
- If Holmes has any need to talk to a friend, Watson is more than enough for that need.
- Out of all his enemies - two guys are really famous: James Moriarty and Sebastian Moran. Both of them belong to the same gang and both try really hard to kill Holmes.

*"That's all Folks!"*
