

AN INCREDIBLE FEAT

... AN INCREDIBLE FEAT

My favourite incredible feat is the “Longest power-assisted ramp jump by bicycle”.

- Colin Winkelmann was a professional stunt rider, who was living in the USA.
- On 20 December 2000, Colin jumped with his BMX bicycle to 35.63m, after he was being towed to approximately 100 km/h behind a motorcycle.
- That happened at Agoura Hills, California, for the *Guinness World Records Primetime* TV show.
- I admire him, because he did an amazing thing with his BMX bicycle.
- Unfortunately, Colin Winkelmann died on 23 of July 2004. He suffered the worst crash of his career during a contest in Maryland. Colin bailed from higher than twenty feet in the air and broke both his ankles and his left wrist.
