

DRONES

ARE VERY USEFUL FOR EVERY DAY LIFE.

CAMERA DRONES

- ▶ These drones are used in shooting movies. They replace helicopters which are more expensive and less flexible than drones.

ARMY DRONES

- ▶ These drones are used in the army replacing the fight jets. The advantages of these drones are: They are low cost, they are not seen by radars and finally, they are not manned. This helps avoid losses of human lives, which is the most important of all. The disadvantage of army drones is that they are slower than fight jets.

AMBULANCE DRONES

- ▶ These drones are very important and useful in order to save human lives.

SPY DRONES

These drones are usually used in the army for taking spy photos . They are smaller and more flexible than fight jets.

TOPOGRAPHIC DRONES

These drones are used by topographers to map areas.
