- Roofers

ASSIGNMENT 6: HOUSES AND HOUSING INDUSTRY

Part 1: Since houses are very crucial for the economic growth and development of a country, how do you think the financial crisis in Greece has affected the housing industry?

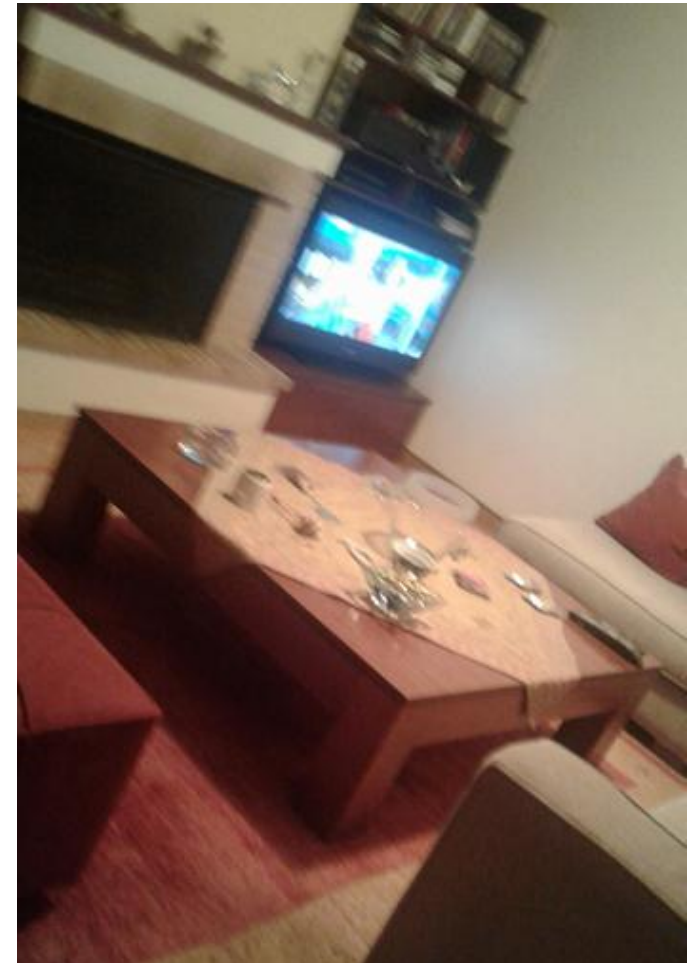

The bad economic situation in Greece has affected a lot the housing industry. Since people don't have a lot of money they avoid building new houses. They prefer to live in a house they already own or even prefer either buying an already built house or rent one. Even if they decide to build a new one they are not going to make it really big but as small as possible to cover the basic needs of a family. All these reasons lead to smaller wages for the people who work in the housing industry.

ASSIGNMENT 6: HOUSES AND HOUSING INDUSTRY

Part 2: What is your favorite part of the house you live in and what are some characteristics that you enjoy about your house?

My favourite part of the house is the living room because there we watch TV and movies. I also like this part of the house because the whole family comes together there and we always have a great time. Although I spend most of time in my bedroom I think the living is more fun because I relax and have a great time there forgetting about the everyday life.

ASSIGNMENT 6: HOUSES AND HOUSING INDUSTRY

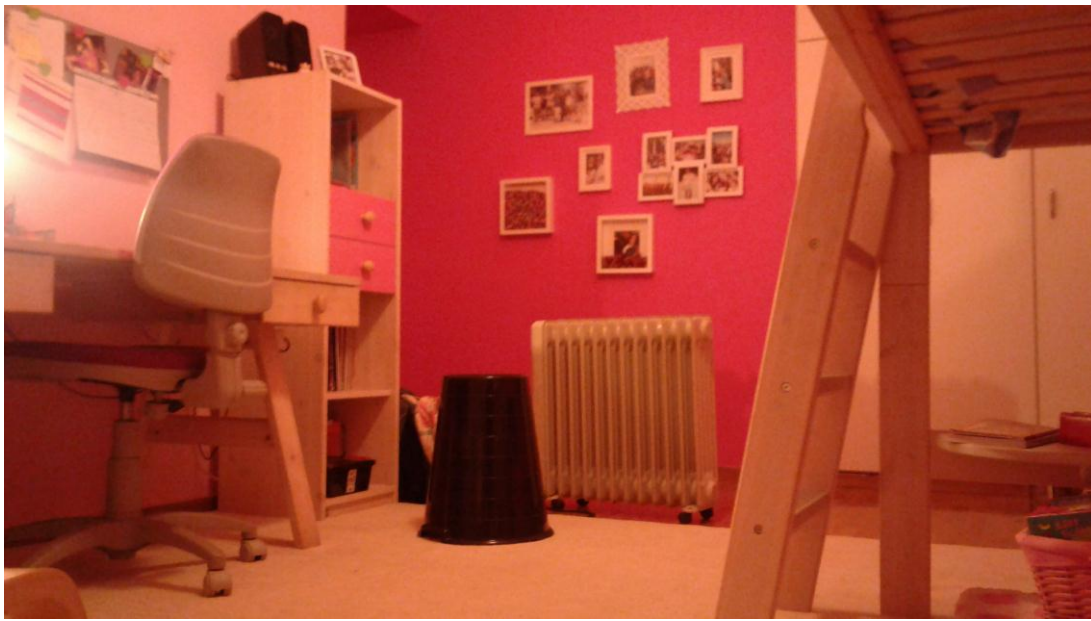

Part 2: How can you imagine the ideal house for a family to be in?

In my opinion the ideal house is a house big enough for the whole family to live there. It must be convenient to have a big kitchen in order to cook without caring about the space. Of course, the children need to have a separate bedroom from the parents so they can feel it like their own space. It must also have one or, better, two bathrooms to cover the needs of the family (it depends on the number of the family members). But in my opinion the ideal house must feel good and unique because "home is where the heart is".
