

My first Forensics lesson was last September. I was afraid because I thought that it would be difficult as a lesson and that I would be the worst student in the class. But from the first day, my feelings changed. I was excited about all the new things I would learn in Forensics! I knew I had been wrong, I loved it. It was the best lesson ever!

We went to a lot of competitions to other schools .I didn't enter to any of them but I was there to watch my classmates doing impromptu speeches and debates. I had and I will have so much fun in this class! My teachers, Mr. James and Mrs. Mariefi helped me a lot because I was new and it wasn't so easy for me. A new world opened for me. In Forensics, I learned new things which I didn't even know that I could do. It's amazing how many activities you learn in an one-hour lesson. I'm thankful to my teachers and my classmates for showing me so many things in one year. I suggest everyone take the Forensics class so they will have the same great experience!
