

This academic year I was a member of the Forensics at IMP and it was an amazing experience! When we started Forensics, our teachers informed us about all the events, such as Group Discussion, Impromptu Speaking and Debate, my favourite. Then, we began to practise and for more help we went to watch some competitions. After many lessons, the time for us to take part in a Debate competition came.

In the ICYD competition, which took place at Champion School, my teammate Zoe and I were very well prepared but we were also very nervous. As soon as the competition started, we were really stressed out. After the first round we relaxed and realized that we could only learn from this experience. By the time the tournament was over, we were so excited about the amount of knowledge we had gained. Now, we can only wait for the next competition next year, but we are impatient.

All in all, the Forensics experience helped me at my English classes, but also at the MUN I took part in. I think that Forensics is a great opportunity for me to improve and I can't wait for next year to re-join. I suggest that all students should take up Forensics!
