

At the beginning of last year, I was so scared to speak in public that I couldn't imagine that one day I would be standing in front of an audience for a number of minutes, talking about a topic! Well, today, after participating in two PFA Tournaments, not only have I overcome my fear to speak in English but I can also address a crowd about any subject for more than seven minutes! Looking back, I can only be grateful for what I gained and thankful for the opportunities that were given to me. During these two years, I had people by side who believed in me and thanks to them, I did not only accomplish my goals but I also achieved more than I could ever imagine. I have managed to speak fluent English and I have also made some life-long friends as I had the chance to work with my classmates very closely, communicate with them and even persuade them in a friendly way. Forensics changed me in so many levels. It made me a better speaker, a better person. Thanks to Forensics I am full of happy memories to look back on.
