A DESCRIPTION OF AN ANIMAL

GORILLA

ALL ABOUT GORILLAS

- Gorillas live in the jungle in Central Africa. They eat fruits and leaves. They are two meters tall and weigh 150-250 kilos.
- Its fur is black or dark grey. But when they get old, their fur is silver on the back.
- Gorillas are stronger and bigger than other monkeys.
- The boy gorilla is double the size than the girl gorilla.
- When they get angry, they hit their hands on their chest.
- Now there are only a few thousands of them. So, we must protect them.

Play and Test !!!!
