

All about Okapis

By Helen Pachnou

All about Okapis

- Okapi lives in the Democratic Republic of Congo in Central Africa.
- It stands about 1,5 m. tall. It has large and flexible ears and a long neck. Its legs are like the zebras' ones! It has white horizontal stripes and rings.

All about Okapis

- Okapi eats tree leaves, grass and fruits.
- They are most active during the afternoon and the evening looking for food.
- The Okapi's tongue measures between 30 and 45 centimeters long. Also, its brown and white marks help to camouflage it in the forest.
