

Jesus Christ lizard

By Filip Armaos

The Jesus Christ lizard is a reptile that lives in tropical forests of South and Central America.

It's 90 cm long. The 50 of his cm are his tail.

The lizard eats **INSECTS**, **FISH**, **SMALL BIRDS**, **SNAKES** and **FLOWERS**.

It's also known as Basiliscus Plumifrons.

But, why is it called Jesus Christ lizard?
Because it can walk on water!
