

# The Polar Bear

# Some information about polar bears

The polar bears are usually white. At the end of spring, their colour changes to yellow from the sun.

They are very strong and fast. They live in Antarctica and North Canada. They're carnivores and they eat other animals like whales and seals. But they also eat some plants.

They are an «endangered» species.

# Some FACTS

## You know that...

- ▶ Their smelling is very sharp. They can smell from 30 kilometres far.
- ▶ They run really fast, around 40 km per hour.
- ▶ They travel around 15,000 km per year to find their food.
- ▶ Their front legs are like canoe paddles when they swim.
