

DROP BEARS
BY STEPHANIA CHANTOUMI

LOCATION, LOOKS, FACTS

- The drop bears live in Australia. They are the size of a leopard or a very large dog. They are 120kg and 130cm long.
- A drop bear is a carnivorous version of the koala.
- They attack people and animals by dropping on their heads .
- We find them in forests.
- Drop bears are known to be very territorial.
