

Friday, 6th October 2017 was a really special day at I.M. Panagiotopoulos School. That is because, Vibenhuis Gymnasium, a danish school visited our school. At first, when they arrived, we gave them a tour around our school premises and then, we had a PowerPoint presentation shown to them concerning the educational system in Greece, alongside with some videos about the Forensics@I.M.P and MUN conferences. Then, they talked to us for a while about the way their educational system works and later on, we had a snack with them while further discussing the differences of the two systems. We really enjoyed ourselves and felt very honoured that we were hosting them that day. Of course, we made some new friends with whom we exchanged very interesting information and points of view. In the meantime, we had the opportunity to slightly explore a system which differs a lot from ours.

Hope to meet our new friends again sometime in the future!
