

THIMUN 2018

During the span of 5 days I have experienced and learned a lot of things.

To start with, learning how to debate properly and work with determination and passion in order to “pass a resolution” as we, the delegates say, is one of these. The 8-hour sessions which we attend and where we go through the MUN routine procedures will stay in my mind forever. It goes without saying that, these “procedures” were exceptionally useful and helped me gain a great amount of knowledge, which will be always with me for the rest of my life.

However, I have to admit that the aforementioned are not, in fact, the most important aspects as far as the MUN experience is concerned, at least for me. What was actually really important for me was the chance that I got to come in touch with students from all around the globe. I am grateful and proud of the friendships that I made with some truly great people, with whom I will be in contact after the conference is over.

To sum up, I can say without hesitation that, the THIMUN 2018 conference has been and will always be one of the greatest experiences of my life.
